PROFESSIONAL OVERVIEW

Product Designer and Front-End Engineer with 3 years of experience designing and shipping products end-to-end. As the sole designer at a vendor-led shop, I turn business requirements into user flows, wireframes, and production code. I think in systems, not screens. I treat design as a tool for solving real problems. I prefer to resolve edge cases and compliance concerns during design rather than after handoff. I ship fast with a genuine understanding of how design decisions translate into code.

WORK EXPERIENCE

- | | |
|---|---------------------|
| UX Designer Gain Secure Sdn Bhd, Malaysia | AUG 2023 – PRESENT |
| <ul style="list-style-type: none">Solo designer across vendor-led projects spanning event technology, petroleum operations, distribution, and consumer services. Own end-to-end design and implementation work.Shape ideas from concept to production code. Work directly with engineers using HTML, CSS, JavaScript, Razor, ASP.NET MVC, and Blazor to resolve permissions, loading, error, empty, and responsive states during design rather than at handoff.Reframe dense workflows. Simplify complex forms, tables, filters, approvals, and bulk actions through clearer hierarchy, smarter validation, contextual feedback, and task sequencing. | |
| UI/UX Designer Intelliware Solutions Sdn Bhd, Remote | APR 2022 – JAN 2023 |
| Front End Developer (Internship) AIME Healthcare, Kuala Lumpur | OCT 2020 – APR 2021 |

VENDOR PROJECTS

Clients work under NDA. Visual limited, decisions discussed in interview.

- | | |
|--|------------------------|
| Konfx. | Event Tech Platform |
| <ul style="list-style-type: none">Designed responsive Web/PWA interfaces for registration, audience interaction, and ops monitoring. Built reusable UI patterns to reduce design-to-code friction. | |
| VST ECS & Daikin | Distribution Platforms |
| <ul style="list-style-type: none">Modernized legacy ASP.NET MVC platforms by optimizing form UX, table layouts, and information hierarchy under tight technical constraints. | |
| FIVE Petroleum | Operations Platform |
| <ul style="list-style-type: none">Designed Blazor interfaces for daily operations, file uploads, and validation states. Collaborated with legal/compliance teams for transparent data handling. | |
| 7-Eleven & Eco-Shop | Engineering Support |
| <ul style="list-style-type: none">Executed C# data binding and frontend logic stabilization prior to final project handover. | |

INDEPENDENT PROJECTS

Goshi Design System [Github](#) [Figma](#) [Design Tokens](#), [Systems](#), [React/TS](#)

Ongoing

- Architected a dual mode system where Consumer (React Native) and Enterprise (Next.js) alias one shared token foundation, using a naming convention that doubles as the code access path.
- Built a pnpm and Turborepo monorepo with independently versioned component packages, Style Dictionary token generation, and 9 architecture decision records.
- Translated the Figma consumer library into 14 components and 4 patterns, with a gap audit flagging what is confirmed against the design file and what stays placeholder.

Cekap - Smart Flight Companion [View](#)
[UX Research](#), [Prototyping](#), [Mobile](#)

Ongoing

- Problem: KLIA travellers combine airline cut-offs, transfers and unpredictable queues alone, under fatigue. Built the case from 17 sourced references after interview recruitment fell through, and cut four claims the evidence failed to support.
- Scope: Designed the v1 slice around a manual checkpoint timeline and a five-state confidence model (confirmed, live, likely, last known, unconfirmed) returning one prioritised next action instead of a full itinerary.
- System: Replaced 17 hard-coded type combinations with a 13-token scale, then built the checkpoint timeline as a coded component on EPDS tokens, tested to WCAG 2.2 AA
- Frameworks: Double Diamond, JTBD, Heuristic Evaluation, Journey Mapping.

SKILLS

PRODUCT DESIGN

User flows

Information hierarchy

Wireframing & Prototyping

UX writing

Interaction & Responsive design

Design process documentation

DESIGN SYSTEM

Foundation libraries

Semantic & component tokens

Figma variables & Code Connect

Component APIs

Multi-mode theming

Components Anatomy & Props

FRONT-END

HTML, CSS & JavaScript

TypeScript

ASP.NET MVC, Core, Blazor & Razor

pnpm, Turborepo & Git

JS Frameworks: React, Vue & Vite

ACCESSIBILITY

Colour contrast auditing

Keyboard focus navigation

Touch targets & reduced motion

Non-colour validation cues

Inclusive design

RESEARCH

Research planning

Secondary research

Journey & affinity mapping

Heuristic evaluation

Usability testing

TOOLS

Figma & FigJam

Notion

VS Code & GitHub

Claude Code & Codex

Visual Studio & Azure DevOps

EDUCATION

Diploma in Information Technology | SEGi College Kota Damansara, Petaling Jaya

Graduated: 2021
